Plant Ecology

**Eva Tornberg**  
Professor emeritus  
Veg of Lund

**A discussion  
moderated by  
Peter Sylwan**  
Science journalist

Climate change is happening and many efforts are made to stop it. But what role can plants play? Can we mitigate climate changes by increasing the capacity of plants to harness CO<sub>2</sub>? Should we change the species we grow and how we grow them? Change our diets? What will make a difference and what is doable?

Join PlantLink on Fascination of Plants day **18 May 2022 from 15.00 in Blå hallen, Ecology Building, Lund university** or online for a discussion on how plants can mitigate climate change. More info: [www.plantlink.se](http://www.plantlink.se)
